

APEC WRF: Accessing FIVS-APACE

1. Visit [www.FIVS.org](https://www.fivs.org)

2. On the homepage there is a blue menu bar. Go to "Member Access."

- Log onto the website using the APEC WRF username and password provided to you. If you need this information, please email Laurel Parker at lparker@fivs-abridge.com

If you are interested in becoming a FIVS Member, please take a look at our [Become a Member](#) page and contact the FIVS Secretariat if you have any questions.

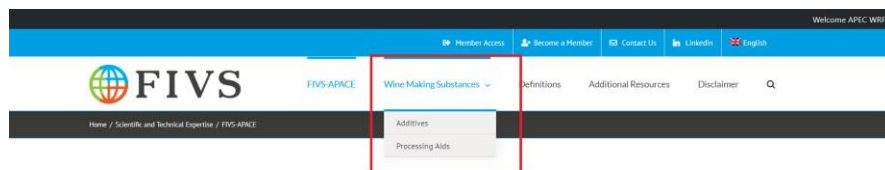

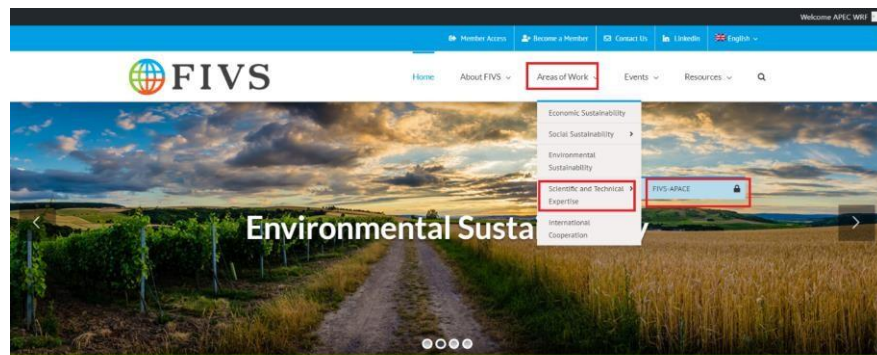

FIVS is an international federation that works for the overall sustainability of the global alcohol beverage industry.

You are logged out.

Please enter a CAPTCHA value.

- Once you are logged into the FIVS website, visit FIVS-APACE under **“Areas of Work” -> “Scientific and Technical Expertise.”**

This will take you to the APACE homepage.

FIVS-APACE

FIVS-APACE is intended to be a comprehensive online information source for additives and processing aids that are approved for winemaking use around the world.

For each additive or processing aid, you will find the following:

- Synonyms
- INS number,
- CAS number,
- Functional Class,
- Technological justification,
- Links to scientific evaluations by JECFA and other expert bodies,
- Recommended usage levels* and
- Status of regulatory approval in various markets around the world, including a link to search FIVS-Abridge.

It is intended to add Material Safety Data Sheets and any other pertinent information over time, so that APACE supplies in one place as much information as possible about permitted winemaking additives and processing aids.

* This is developed on the following basis, which is the convention in the Codex Alimentarius Committee on Food Additives, and agreed by consensus by the membership of FIVS in <http://scientific-and-technical-expertise/fivs-apece/wine-making-substances/>

5. Visit “**Wine Making Substances**” and choose Processing Aids or Additives to choose from the wine making substances offered.
